Dimar Announces Release of its new line of Carbide Tipped Forstner Bits!

Toronto, Ontario - Dimar Canada Ltd. is proud to announce the release of its new Bormax3 Carbide Tipped Forstner Bits as part of the company's **NOVA INDUSTRIAL SOLUTIONS** product line.

These new Forstner Bits are designed for the most demanding woodworker. Manufactured from German made tool steel these bits cut in a way that minimizes heat build up while drilling in hardwoods, chipboards and plastic. Dimar Bormax3 bits have been developed with tungsten carbide teeth for drilling tear-free and accurate holes every time. Even extreme hard tropical woods are no problem for this bit.

Product features & Benefits

- A true carbide tipped Forstner bit (Made in Germany)
- Carbide centering point
- High cutting quality
- Carbide main cutting edge and carbide teeth
- Less friction, no overheating
- Less power needed
- For use with hand drill & drill press machines
