Dimar's Woodpecker Professional Cope and Stick Router Bit Sets

Toronto, Ontario - Dimar Canada Ltd. is proud to announce the release of its new line of Cope and Stick router bits sets as part of the companies Woodpecker Professional Solutions brand.

These specialized router bits are designed for the making of doors, wainscoting, and other decorative features for cabinets, furniture and homes. In Cope and Stick construction, all of the parts of the frame are given a decoartive profile on the edge to be joined to the panel, and the horizontal parts are also given what is known as a cope cut across the end grain of the wood.

Dimar offers nine different Cope and Stick router bit sets to choose from. Each set is comprised of two individual bits. Each router bit has 3 high quality carbide cutting edges designed to give you a much smoother and cleaner finish than the standard 2 cutting edge router bit. The thick carbide tips guarantees to prolong the service life of the tool.
