

KNIVES for DEWALT PLANER

NOVA
INDUSTRIAL

The DeWalt DW734 utilizes a very powerful 15 Amp, 10,000 rpm motor, that is mainly designed to handle larger, deeper cuts in hardwoods. (Naturally, softwoods are welcome too). The three knife cutter head provides 96 cuts per inch, which makes it one of the finest finishes of any portable planer.

That is why you need Top Quality blades only!

Our Premium Grade HSS 18% knives will deliver performance unmatched by its original installed blades as well. The blades have Double Edge extremely sharp edges.

They are designed as a Reversible and Disposable knives, but may be resharpened by an experienced professional sharpener.

The Dimar blades are made in Europe.
