

Show off your merchandise in style!

Our new product display will exhibit the products in an exciting and practical way.

The full vision product display features durable see through *acrylic panels* from 3 sides, so viewers can see the products from all angles. The backing *Pegboard* will accept standard hooks that are easy to set up, move and rearrange the products, making them a smart choice for many retailers that constantly move their products around as product mix may change.

Individual units may be doubled up for twice as much space and have an attractive corporate banner at the top. The banner shows a collection of DIMAR products, clearly distinguishing between the **NOVA™** and the **WOODPECKER™** brands.

Overall dimensions: 38" height x 20" deep x 70" wide
