

“Your Inside Look Into The Woodworking Industry”

The Dimar Insider

www.dimarcanada.com

Router Bits ♦ Drill Bits ♦ Saw Blades ♦ Planer Knives ♦ Cutters ♦ Bandsaws ♦ Abrasives

Toronto, Ontario - Dimar Canada Ltd. is proud to announce the release of its new Nova Industrial Engraving System for CNC Routers (Tool # G1853X04 (arbor 1/4" shank) and tool # G1853X08 (arbor 1/2" shank).

This innovative tool features one tool body (available in 1/4" or 1/2" shank) with 40 Unique Insert Knives designed for a variety of applications such as; Straight cutting, Core box, Round over, V groove and Chamfering. This way, the user does not have to purchase a new tool body to create different types of engraving patterns.

This tool features industrial quality disposable solid carbide insert knives which will allow the user to maximize the lifetime of the tool body while ensuring the cut of the material will never be compromised. The tool is engineered to allow the user to quickly change inserts while mounted in CNC machines, eliminating unnecessary down-time while maintaining cutting accuracy. These German made knives last two times longer than comparable solid carbide router bits and can be used to cut difficult laminate materials, veneers, MDF, Plastics, as well as Wood and Solid surface materials. The V Groove Inserts can also cut Aluminum. Insert knives are sold separately.

Why Choose Dimar's Nova Industrial Engraving System?

Durability

Replaceable Carbide knives are harder, stronger, longer lasting and perform better on abrasive materials.

Service free

The Router Bits do not need sharpening. Simply replace the carbide knives.

Accuracy

Carbide knives have consistent and precise profiles for optimum and continued operation without adjustments.
