**Router Bits ♦ Drill Bits ♦ Saw Blades ♦ Planer Knives ♦ Cutters ♦ Bandsaws ♦ Abrasives**

Toronto, Ontario - Dimar Canada Ltd. is proud to announce the release of its new NOVA Industrial Raised Panel Insert Router Bits, Tool # 26R884 and 26R885.

These innovative tools feature industrial quality disposable insert knives which will allow the user to maximize the lifetime of the tool body while ensuring the cut of the material will never be compromised.

This tool features two cutting flutes which will allow for a smooth clean finish. This unique tool also gives the user the ability to add a back cutter (sold as an additional part #8225010) to the base of the existing tool body. In this way, the customer does not have to purchase a new tool body to create a back-cutter at the bottom of the material.

These products are suitable for light CNC and manual routing applications. An assembled ball bearing seat and an anti-dust plug are also included with the set.

### Why Choose Dimar's Nova Industrial Raised Panel Insert Router Bits?

#### Durability

Replaceable Carbide knives are harder, stronger, longer lasting and perform better on abrasive materials.

#### Service free

The Router Bits do not need sharpening. Simply replace the carbide knives.

#### Accuracy

Carbide knives have consistent and precise profiles for optimum and continued operation without adjustments.

#### Cost effective

Longer lasting knives, better performance, down time is minimal.
