Tension

Dynamic Straightness

Tool no.	Dia.	Teeth	Kerf	Bore	Category
8-48 TN	8"	48	.118" (3.0mm)	5/8"	S
10-80 TN	10"	80	.134" (3.4mm)	5/8"	S
10-80 TNX	10"	80	.126" (3.2mm)	5/8"	S
12-96 TN	12"	96	.134" (3.4mm)	1"	S
14-108 TN	14"	108	.134" (3.4mm)	1"	S
16-120 TN	16"	120	.157" (4.0mm)	1"	S

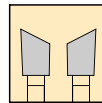

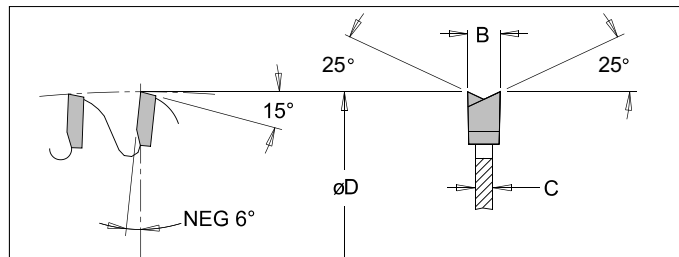

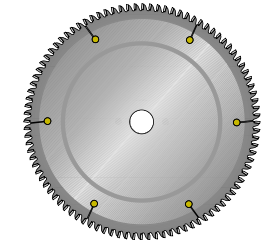

Combination Carbide Tipped Saws for Miter Saw Machines

Among the most popular applications are Miter Joint cuts in:

- * Soft and hardwoods
- * Painted mouldings
- * Gesso (a white paint mixture consisting of a binder mixed with chalk, gypsum, pigment, or any combination of these)
- * High-gloss and pre-finished picture frames
- * PVC substrates (PVC is a thermoplastic polymer)

Precision quality saw blades specifically suitable for working on single or double cut-off miter machines and radial arm saws. Unique tooth configuration of 4 Teeth ATB and 1 Raker together with Negative hook, makes these blades the right choice for a wide cutting applications.
