

"Your Inside Look Into The Woodworking Industry"

The Dimar Insider

www.dimarcanada.com

Router Bits ♦ Drill Bits ♦ Saw Blades ♦ Planer Knives ♦ Cutters ♦ Bandsaws ♦ Abrasives

Toronto, Ontario - Dimar Canada Ltd. is proud to announce the release of its new Nova Industrial Tongue and Groove Router Bit Set with Carbide Insert knives, Tool #'s 43R8-5 and 43R8-6.

This innovative tool features disposable Solid Carbide insert knives which will allow the user to maximize the lifetime of the tool body while ensuring the cut of the material will never be compromised.

The Tongue & Groove set (2 pieces) features two cutting flutes which will allow for a smooth clean finish. It is a unique tool that gives the user the ability to purchase one tool body (one tongue and one groove) that can create **FOUR unique Tongue and Groove patterns just by changing the insert knives on the tool.**

All four Tongue and Groove profiles can be used on the same router bit bodies. In this way, the user does not have to purchase a new tool body to create a different tongue and groove profile. These products are suitable for manual routing applications as well as light CNC routing. The recommended wood thickness is from 5/8" (16mm) to 1 1/8" (28mm).

Why Choose Dimar's Tongue & Groove Router Bit set with disposable carbide insert knives?

Durability

Replaceable Carbide knives are harder, stronger, longer lasting and perform better on abrasive materials.

Service free

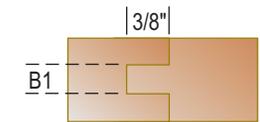

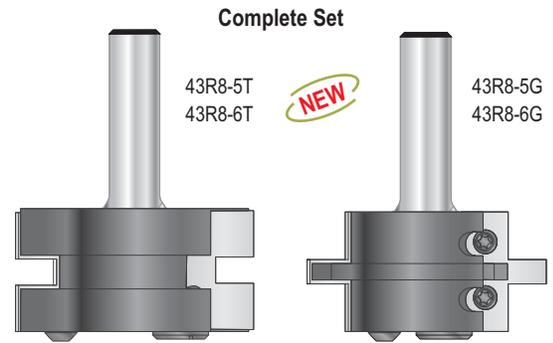

The Router Bits do not need sharpening. Simply replace the carbide knives.

Accuracy

Carbide knives have consistent and precise profiles for optimum and continued operation without adjustments.

Cost effective

Longer lasting solid carbide knives, better performance, down time is minimal. Only the Carbide Knives are replaced.

43R8-5 (B1 = 5.4mm - 6.0mm)
43R8-6 (B1 = 6.1mm - 6.6mm)
Adjustable with set screw
