Dimar Announces Release of its New and Improved Woodpecker Professional Carbide Tipped Dado Set Model # WP824DCL

Toronto, Ontario - Dimar Canada Ltd. is proud to announce the release of its new and improved Woodpecker Professional carbide tipped dado set, Model # WP824DCL.

This new and improved dado set will produce flat bottom grooves with splinter free edges in all natural woods. The blades feature 24 teeth with thick C4 carbide for guaranteed sharp edges and longer tool life. Fully versatile, this dado set can be set from 1/4" to 1" widths at 1/16" increments. The set also includes **FIVE** chippers (rather than the standard four), including a 3/32" chipper for smaller increments to accommodate actual wood sizes.

Micro increments widths are also made easy with a fourteen piece shim set which is included in the package.

The positive angle tooth design, coupled with the anti kick back saw blade body; will result in a safe and easy feed while protecting your machine from overload. The new adhesive black coating on the dado blades allows for easy cleaning while preventing less working friction and less resin adhesion while in use. The set includes an attractive aluminum case with a foam insert for safe keeping.

This dado has the all the features of an expensive dado, at a very attractive price.
